

Dear. Dr. Burt.

Thank you for allowing me to come to Northwestern Medicine to have a stem cell harvest and transplant for my scleroderma. I know that I was going to die, and that you have all given me a new life. In Buddhism you have to die before you are reincarnated. For this my husband and family and I will be eternally grateful.

Dr. Burt your pioneering work treating people with stem cells has enlightened this world.

ကျေးဇူးတင်စွာ (Thank you).
