

FINISHER

Thank You
from the
Bottom of my
Heart
and
Soles!
Cyndy

Jan. 18, 2013

Dear Dr. Burt and the Entire Team;

Today is my Day 60 and I feel well. I may have some Scleroderma symptoms still, but I can move, bend, run, plan and live life again. I don't feel the black cloud of a short life hovering over me night and day anymore.

Words cannot properly express my gratitude for what you have done for me and for autoimmune diseases in general.

Thank you!

I am sending you some bears I had made for our Walk-a-thon last year. Maybe they will help spread Scleroderma awareness. And I have printed one of my Facebook posts to show you how many people you touched by treating me. We never know how many ripples we send out when we touch one person, do we?

Please let me know how I can support you going forward.

Sincerely,

Cyndy
