

Hi Dr. Burt,

I called NW today and heard u all no longer there, I was shocked! I'm so grateful for u and your team for saving my life! I cant say it enough! The care that I was given during and after my stemcell will never be forgotten! I'm scared now that the Immunology Department is gone at NWM Hospital. I always new I can give u a call and have your back on your opinion, when health problems come my way. Your presence gave me peace and no worries. I tell my team of doctors I need to talk to " Dr. Burt", before I do anything or ask them to call u. I understand and knew someday this would happen. Life does change and new things to learn and explore. I wish u the best wherever u do next!

What do we do now when problems come about and we need "Dr. Burt"?

I've never met anyone so kind, caring extremely intelligent. I prayed to God to bring u to me, my prayer was answered, THANK U SO much!

Darlene
