

Celebrating

all the good work

we've accomplished

together this year...

Dr. Burt,

Lisa and I both sincerely thank you for all of your work and especially with helping Lisa gain back her life. The changes have been extraordinary and we both hope for her continued improvement. Thank you so very much! God bless you and your work! Doug

Dr. Burt,

When I finally got my SPS diagnosis after years of fighting insurance and seeing hundreds of doctors, I never thought there would be hope of living a normal life again. You are a brilliant doctor, kind soul and we feel so incredibly blessed to be a success story with your stem cell research!! You have changed our lives in ways we never thought were possible!! With many thanks and blessing, Lisa

...and wishing you
a joyful holiday season.

Merry Christmas Dr. Burt!
Lisa and Doug
