Dr.Burt is a brilliant doctor is trully for the patients .He cares about his patients. He is the only doctor in USA to do HSCT for Multiple Sclerosis (been dosing research since 1995) and other autoimmune diseases that this treatment stops the disease progression and you get off all crazy drugs that suppress your immune system. He treated my fiance for MS with HSCT. His team were all supper professional and compassionate. The nurse that was in charge of following my fiance after HSCT was on top of things we were always able to reach her via email right away. I think when you first start the treatment process /approval getting an appointment for evaluation you have to wait for a while.
