

THANK YOU | SO MUCH

It's hard to find the words to express such immense gratitude. It is moving to know such great kindness & dedication.

Thank you for facilitating the MANY miracles in this process for me. Thank you for giving me an opportunity beyond my wildest dreams, saving my life, restoring a lost faith in our healthcare system and changing the future of medicine. My family and I are forever in debt to you and your brilliant team. We are passionate about improving quality of care and if there is ever anything at all we can do to help HSCT become a standard of care for others or help in ANY way please let me know.

I have always identified with Michael J. Fox's description of living with a progressive brain disease as being tied to a train-track. You know it's coming

but don't know how fast or hard it'll hit. HSCT is the chance to be freed.

THANK YOU FOR STOPPING THE TRAIN!

Thank you a million / times over .

With deepest gratitude,

Jamie
