

September 2019

D. Burt-

I am not sure how you thank someone for giving you back your life. But, I am going to try. When you get this note, I will have just celebrated my 75th year since I left school.

I've had seven years to get better - stronger - healthier and so incredibly grateful. I have no idea what I will do with the rest of my life but, I promise you it will be done with love and a lot of joy.

The lessons I have learned about life; myself have been immense. I hope you know the impact you have had on my life and all of the lives - not only your patients but for every person that loves each one of them. I know profound

I would love to say thank you for saving me - thank you for all the years of dedication - you never giving up. You are a kind and generous person and I am so blessed to have had you as my doctor. I hope your next chapter is full of joy and wonder. I am alive because of you. These are just not enough words for what that means to me.

Profoundly Grateful -  
In joy.  
Derrifoe
