

20.12.2018

Dear Dr. Burt,

Jarah sent us the great news that her recent MRI's showed no new lesions on her brain or spine or evidence of any new MS symptoms. She also excited us a lovely photograph of herself with you. We are so happy for her and for you + your wonderful HSCT team that this treatment has our dearly loved daughter feeling + looking so well.

Perhaps one day you will make your way to our beautiful part of the world! We would be thrilled to meet you.

We hope + pray for the continued success of HSCT and our deepest wish is that the FDA will soon approve your magnificent work -
Thank you so much. We wish you

→

a Very Happy Christmas and New Years

Sincerely,

Norm + Noe
