

Dr. Burt,

There are truly no words to describe my feelings after receiving a voicemail from you in late 2015 inviting me to return to Chicago for another evaluation for your new cardiac safe protocol. I know you know how devastated I was when I was initially denied in 2013. But you cared! You remembered me! And, you gave me the biggest gift I wished for....You gave me back a life. Because of you, I am holding steady and my disease is no longer "smoldering."

Thank you for being a pioneer in this field and continuing to refine and develop new protocols to help as many of us you can.

I hope you enjoy your sabbatical, especially after years of being so involved in your patients' care.

With much love and gratitude,
Julie
