

Dr. Burt,

You're a difference maker. For thousands of people, you've made the difference in their well being, their hopes, their futures... Because of your perseverance and grit, families have seen the lives of loved ones restored to them. Because of your life of excellence, the work has spread, and others are seeing the way. I have no doubt you will continue to show them the path. You will have effectively made the difference in the lives of millions of people—many of them long after our time on this Earth. Thank you for so much more than saving my life.

Marshal
