

Dr. Burt,

I want to thank you for giving me a chance at living my best life, one without MS. Prior to transplant, I will admit, I lived with anxiety on what my future would bring. Now, I enjoy each day not worrying about the next relapse and what function may be taken away. Three years later, I remain off all MS medications and have had no relapses or progression. I'm more active than I have been in a long time, from playing tennis with my family and going to the gym to hiking in the Smoky Mountains. Simply put, it has been amazing. From the bottom of my heart, I thank you.

Randi.
