Diseases - Northwestern Medicine

"STEM CELL THERAPY FOR
SCLERODERMA"

Christy McCaffrey

Executive Director of Project Scleroderma, a
non-profit organization with a primary mission
to dramatically increase the global level of
scleroderma awareness.

"PROJECT SCLERODERMA"

This forum is a collaborative effort between the Scleroderma Foundation, Tri-State Chapter and the HSS Divisions of Public & Patient Education and Education & Academic Affairs. Our common goal is to provide information to the public, patients/families and healthcare professionals through an array of health education programs today, so everyone can have a healthier tomorrow.
