MULTIPLE SCLEROSIS

01 February 2018

Professor Richard K. Burt
Chief of Immunotherapy & Autoimmune Diseases; & Professor of Medicine
Division of Immunotherapy
Northwestern University Feinberg School of Medicine

Dear Professor Burt,

We, the Chairmen of the 'Multiple Sclerosis at the Limits' international medical education conference, would like to invite you to present at the 2nd annual event which is being held at the **Royal College of Physicians, London, UK on Tuesday 6th & Wednesday 7th November 2018.**

By way of introduction, 'Multiple Sclerosis at the Limits' is part of the 'At the Limits' medical education series that has been running for over 20 years.

The meetings attract and feature the world's finest clinical and basic scientists as guest speakers, all truly at the leading edge of research, and this event will focus on a range of diverse but highly important issues, both global and local, that we believe are at present challenging neurologists throughout the world. We ask the faculty to consider the limits of knowledge and present new and exciting discoveries from their ongoing research; with that in mind we would be delighted if we could persuade you to present on the subject of:

'Haemopoietic stem cell transplantation in the management of multiple sclerosis'

The audience being addressed consists of approx. 200 senior MS clinicians personally invited by us from Europe, the Middle East, Asia and beyond.

For further information on our annual meetings please visit our website: <http://www.atthelimits.org>
