

**Subject:** Re: Invitation to Key Note Speech at Living Well with MS

Dear Dr. Burt:

We are looking forward to your participation at the **LIVING WELL WITH MS** conference on May 30, 2009 in Milwaukee. Pamela Dry from my office will be contacting you to assist you with your travels and accommodation while in Milwaukee.

The program is for patients, so if you have any pictures, videos or cartoons, to make it easy for them to understand the potentials of stem cell therapy, would be great! Dr. Aileen Anderson Ph.D, Associate Professor, University of California Irvine, will also be speaking at the conference. She will focus on the basics of stem cells and her work related to CNS - repair with stem cells. Each of the speakers will have 30-35 minutes with ample time for "question and answer" session ( patients find this session very rewarding).

If I or my staff can be of any help. please do not hesitate to let us know.

Regards,

Bhupen.

Bhupendra O. Khatri, M.D.
