

Thank  
you

To All the Doctors + Staff at the Auto-immune Clinic.

My heart is full right now - Full of gratitude for each one of you and what you did for Jay Elissa and more recently for the most gorgeous flowers. Dr Burt I thank you for your comfort, I am certain this isn't easy for you either. I pray that the research isn't too adversely affected for it was Jay's + my continued joy to have been a part of your study. What you gave to Jay - her health, and your friendship can never be reckoned up by dollars. God brought you to us when we were at our end. And you like quiet heroes worked your medical magic -

on joy. You gave to her  
her life back. We have  
no regrets! We would do  
it again in a heartbeat  
even knowing what we  
know right now. - I've re-  
marked, "even if I only get  
1 1/2 months of feeling better  
it will be worth it."  
You gave her back her  
life + for that I am  
humbled + eternally grateful.  
Barbara
