

thanks

Dear Dr. Burt

I am sure you have heard many success stories and seen some amazing people get their lives back. While my journey to Chicago has been long and challenging, it has proven to be the ~~most~~ life changing experience of my life.

While there is no cure, I fully believe that I will recover 100% and be able to chase my kids, play golf and maybe even jog without restrictions.

The level of care administered by all three of you and your staff is nothing other than top tier and professional. What you have done for people with MS, CIDP, ~~and~~ Lupis is amazing and I have made it my mission to tell the world starting with Facebook, the LA Times, Chicago Sun Times and Ellen Degeneres. I look forward to my return visit in January. Love you guys and God Bless!  
Abe
