

July 20, 2016

To Dr. Burt and team,

It is hard for me to put into words how much you have impacted my life, and to express my gratitude, but I'm going to try.

Today is my Stem Cell One year birthday! I feel as if I got my life back, and can see a bright future. A year ago my day consisted of lying in bed, so fatigued I slept the majority of the day. Today I can walk with a cane instead of a wheelchair, and around my house unassisted! I have started working again on part-time basis and have plans to finish school and get my degree. This is all thanks to you and the procedure.

I feel so blessed to have been able to experience this miracle. That's honestly how I feel about it--that it has been a miracle that I've been granted and you and your team are my Angels! I am one lucky girl~

Sincerely,

*Jessica*
