

**The Evanston Hospital Multiple Sclerosis Support Group
invites you to a fascinating presentation of ongoing clinical research
for multiple sclerosis and other autoimmune diseases**

with nationally known Chicago neurologist and clinical researcher

Dr. Richard Burt

“Stem Cell Transplantation for Autoimmune Diseases”

Wednesday, July 19

7 to 8:30 p.m.

Evanston Hospital Doctor’s Dining Room G966

Dr. Burt is Chief of the Division of Immuno Therapy and Autoimmune Diseases at Northwestern University. He pioneered the field of stem cell therapy for autoimmune diseases, doing the first hematopoietic stem cell transplants in the U.S. for multiple sclerosis and other autoimmune diseases. He serves as principal investigator on National Institute of Health-funded clinical trials of stem cell transplantation for autoimmune diseases, and has been quoted and/or reported in many national media outlets.

The presentation is free and open to the community

Reservations are requested
