Associate Professor of Medicine
Director, Bone Marrow Transplant Program
Deputy Chief of Hematology Oncology

November 27, 2002

Richard Burt, M.D.
Bone Marrow Transplantation
Northwestern University Medical Center

Dear Richard:

Thank you again for the outstanding lecture that you gave at our weekly BMT lecture series. The many favorable comments I heard from the audience emphasized the excitement that your work has generated. I know that Karen Ballen and I are very interested in collaborating with you in future transplant protocols for autoimmune disease.

Again, thank you for coming to Boston and for your contribution to our lecture series. I look forward to seeing you again at one of the meetings in the near future.

Sincerely yours,

Thomas R. Spitzer, M.D.
