

It is with a full heart that I write this email to thank you for taking care of my daughter and making this treatment available through your pioneering, dedicated research. You have definitely changed the course of how MS and other diseases are and can be treated. You are a true hero and I can't find the words to adequately express the gratitude I have for you and your team. Thank you. I know that there is no guarantee in medicine and experience successes and failures and everything in between with my patients that I treat. I do believe that this treatment is the best option and gives her the best chance for beating the disease and I will forever be indebted to you and your work. Thank you for taking care of my daughter. You have made me a better physician, watching your dedication and genuine care for your patient has been inspiring and has changed the way I approach my patients.

Sincerely,

Jared
