

I am very grateful for all that Dr. Burt has done for me. I owe my health and many of the achievements I had to him - health is all that matters in life.

I learned a lot from him about practicing medicine with passion and about really caring for the patient.

Today I am a doctor and I certainly exercise my profession with much more love and compassion for my patients.

“Follow your passion, do what you truly believe in, and then, you’ ll make life worth living”

I really admire him

Luana.
