MSA
MESS
WITH THE
WRONG
GIRL

Hi Kate,

I wanted to send my sincerest thanks to you and Dr. Burt. I received my first MRI results after transplant recently and it was all great news. Because of Dr. Burt and his team, I have hope and excitement for what the future holds...something that was very much lost after my MS diagnosis. To say that I am incredibly grateful would be an understatement. I don't know what my life would have looked like without this trial so again, thank you for accepting me into the study and being there every step of the way. I hope you both have a wonderful holiday with your loved ones.

Sincerely,

Shealyn
