

Dear Dr. Burt,

I am grateful for the opportunity to work with you for the last five years. It is impossible to describe everything I have experienced and learned while working under your guidance. I want to tell you that your approach to academic and clinical practice, will have an everlasting imprint on the way I will work in the future. The science applied to direct patient care is one of the reasons I decided to spend my career in research. Your work in many levels is above that goal, innovative, bold, courageous (why not) with only one thought: improving and prolonging life of your patients.

If I have to choose one thing that I will remember, it would be your commitment to the patients and your dedication to their well being.  
And I can tell with confidence that my professional life will have another critical mark: career before and after working for Dr. Burt.

Thank you very much for everything.

Sincerely,

Dr. Indira .
