

Dear Dr. Burt,

You treated my mother with a stem cell transplant in December 2002 at Northwestern Memorial Hospital in Chicago. She lived for another 20 years due to the stem cell transplant. She had an aggressive form of scleroderma. Unfortunately, she passed away in 2021.

My dad and I will be in San Diego the week of July 20th and see you are now working for Scripps. We would like to meet with you in-person and thank you for giving her another 20 years of life. She got to see her grandchildren due to you, which would never have been possible without the stem cell procedure.

Not sure if you have the time or if this is something you'd be open to but please let me know.

Thank you

M
